

Professional Summary

Aspiring Data Engineer with hands-on experience in PySpark, SQL, and Azure , Airflow, now expanding into Generative AI, Retrieval-Augmented Generation (RAG), and LLM-based data systems.

Technical Skills

Programming: Python, Java, C++
Data Engineering: ETL Pipelines, Data Modeling, Medallion Architecture
Big Data: PySpark, Data Warehousing, Distributed Processing
Databases & Storage: SQL, PostgreSQL
Cloud: Azure (ADF, ADLS Gen2, Databricks, Key Vault)
Databases: PostgreSQL, SQL, Parquet
GenAI & LLMs: LangChain, RAG Pipelines, Prompt Engineering
Tools: Git, GitHub, Power BI, Airflow

Projects

Stock Data Pipeline using Airflow| Python, Pandas, Airflow | [LINK](#)

- Developed an end-to-end data pipeline to ingest stock market data from APIs.
- Processed and transformed data using Python for reliable and structured storage.
- Analyzed stock trends to derive meaningful insights for decision-making.
- Orchestrated the pipeline using Apache Airflow for automated and scalable execution.

End-to-End Azure Data Pipeline with RAG Integration| ADF, ADLS Gen2, Databricks, Power BI, LangChain | [LINK](#)

- Built an ETL pipeline to ingest on-prem data into ADLS using Azure Data Factory.
- Performed data transformations using PySpark with Bronze, Silver, and Gold architecture.
- Designed structured datasets to support efficient querying and analytics.
- Implemented a RAG-based solution using LangChain to enable natural language querying on processed data.

Aadhaar Data Analysis – UIDAI Data Hackathon| Python, Databricks, SQL, Power BI | [LINK](#)

- Processed and cleaned 50+ lakh records using PySpark and SQL.
- Handled missing values, duplicates, and inconsistent region mappings.
- Built dashboards for demographic and anomaly analysis.
- Delivered insights for large-scale government dataset optimization.

Education

B. Tech in Computer Science

Shivalik College of Engineering (Aug 2023 – Jun 2026, Expected)

Diploma in Electronics & Communication Engineering

Government Polytechnic Dehradun (Aug 2019 – Jun 2022)

Achievements

- Solved **200+ LeetCode problems** focused on Data Structures & Algorithms.
- Strong interest in **ETL automation, cloud-native data architecture, and large-scale distributed processing.**
